

## Poster Presentation Guidelines

### Where and when to hang up and take down your poster

1. Posters will be displayed in the Lobby Area on the 4<sup>th</sup> floor of the Biopolis Matrix building in Singapore, in front of conference auditoriums.
2. The poster panels will show numbers corresponding to your abstract number. For your poster, there will be a **vertical, free-standing (0.95 meter wide x 2.4 meters tall)** composition board. Boards may be one to two cm smaller in either direction. Electricity will not be available at any board. Attention, the poster orientation is **PORTRAIT** Format!

***Tip: Make your poster in A0-format.** This way, your poster fits nicely on the board, and conference attendees can read the poster also when there are many people around.*

3. Each author is responsible to hang up and remove their presentation. Special attachment material will be available for attaching posters to the boards. Please do NOT use tacks, pins or regular tape.
4. **Set up** is scheduled for Monday between 08:00 and Noon.
5. **Tear down** will be on Thursday between 15:30 and 17:00. Posters not removed by 17:00 on Thursday will be removed and discarded. IPTC2016 accepts no responsibility for material that may be lost or damaged.
6. If you plan to arrive later than the scheduled set up time, please make an arrangement with a colleague.

### When to present your poster

Please be at your board during the dedicated poster session on **Tuesday 27 Sept. from 16:30-18:00** to discuss your work one-on-one with the conference participants.

*Tip: The posters are displayed next to the coffee break area. Take the opportunity to make a private tour to your poster with other conference attendees that are interested in your research.*
